FIELD MANUAL

ROP

CYCLE 64 / ROP

PROGRAMMING REFERENCE

LAB COPY - 04

FIELD REFERENCE / NO. 01

01 / INPUT CONTROLS

Build, edit, test, repeat

Use the editor keys to assemble a route before sending the robot into the facility.

EDITOR CONTROLS		PROGRAM LENGTH: 32 LINES
UP / DOWN	**SELECT LINE**	Move the selection to an instruction slot.
COMMAND KEY	**ADD / REPLACE**	Type a command key to set the selected instruction.
LEFT / RIGHT	**CHANGE PARAM**	Adjust the selected instruction's parameter.
I	**INSERT**	Insert an empty instruction line.
DEL	**REMOVE**	Remove the selected instruction line.
RETURN	**NEXT**	Advance to the next line.
U	**MISSION LOG**	Open the mission log.
F5	**MUSIC ON / OFF**	Toggle music. Sound effects remain on.

F1 / RUN	F3 / STEP	F7 / RESET
Start autonomous execution	Execute step by step	Reset the run

OTHER ON-SCREEN SHORTCUTS V = LOGS / H = HELP / SPACE = BACK / LEFT & RIGHT = HELP NAVIGATION.

02 / COMPLETE INSTRUCTION SET

Ten commands, precise costs

Quickly identify the parameter, cycle cost and purpose of each ROP instruction.

THE COMPLETE COMMAND REFERENCE — 10 COMMAND ENTRIES

KEY	COMMAND	PARAMETER	CYCLES	HOW IT IS USED
N/E/S/W	MOVE	1-15 tiles	1 / tile	Move in a chosen direction.
T	WAIT	1-15 cycles	1 / count	Pause before the next instruction.
P	PICK	DIR	1	Pick up adjacent cargo.
D	DROP	DIR	1	Drop cargo in a chosen direction.
R	READ	DIR	1	Read a nearby terminal or record.
A	ACCESS	DIR	1	Use an available access code.
C	SCAN	NONE	2	Scan the surrounding area.
X	RESET	NONE	--	End the current loop.
B	BOOST	DIR + NUM	HALF*	Move faster; rounds up.
L	LINK	DIR	2	Transfer robot control at an uplink.

FIELD NOTES ACCESS USES THE RIGHT CODE IF FOUND. BOOST AND LINK REQUIRE FIRMWARE UPGRADES. *BOOST COST ROUNDS UP.

03 / TIMING AND EXECUTION

Make every cycle count

A compact field worksheet for movement, scanning and firmware-accelerated travel.

WORKED PROGRAM

EXAMPLE ONLY

01	N 03	MOVE NORTH	3
02	C	SCAN	2
03	E 02	MOVE EAST	2
04	T 02	WAIT	2
05	X	RESET	--

3 + 2 + 2 + 2 = 9 CYCLES

RESET ends the loop; no cycle cost is shown.

TIMING RULES

CYCLE LEDGER

MOVE: 1 CYCLE PER TILE

WAIT: 1 CYCLE PER COUNT

PICK / DROP / READ / ACCESS: 1

SCAN / LINK: 2 CYCLES EACH

BOOST COST

`CYCLES = CEIL(DISTANCE / 2)`

`7 TILES -> 4 CYCLES`

ROUNDING EXAMPLES

1	2	3	4	5	7	15
1	1	2	2	3	4	8

TOP: DISTANCE / BOTTOM: CYCLES

BOOST REQUIRES A FIRMWARE UPGRADE.

04 / THE GLYPH ATLAS

Recognise every symbol

Learn the markings for equipment, security devices and hidden passages.

BASIC FACILITY SYMBOLS

7 ENTRIES

ROBOT

CELL

SOCKET

WALL

GATE

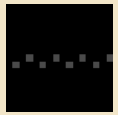

EXIT

TERMINAL

SPECIAL AND ADVANCED SYMBOLS

12 ENTRIES

LASER ON

LASER OFF

SEALED PANEL

DUCT HATCH

SEALED DOOR

FIRMWARE

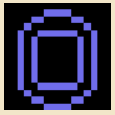

UPLINK

STORAGE RACK

CONTROL CHIP

PROGRAMMER

REACTOR MODULE

STASIS POD

05 / TEAR-OUT REFERENCE

The pocket command card

Keep this leaf beside the keyboard - editor keys, run controls and ROP costs.

EDIT THE PROGRAM	
UP/DOWN	SELECT LINE
COMMAND KEY	ADD / REPLACE
LEFT/RIGHT	CHANGE PARAM
I	INSERT LINE
DEL	REMOVE LINE
RETURN	NEXT LINE

EXECUTE & AUDIO	
F1	RUN
F3	STEP
F7	RESET
F5	MUSIC ON / OFF
SFX	STAY ON
32	MAX PROGRAM LINES

LOGS & HELP	
U	VIEW MISSION LOG
V	LOGS (FOOTER)
H	HELP
SPACE	BACK FROM HELP
LEFT/RIGHT	HELP NAVIGATION
3	HELP SCREENS

COMMAND COSTS AT A GLANCE

PULSE / ROUTE ARE UPGRADES

MOVEMENT	
N / E / S / W	1 PER TILE
T / WAIT	1 PER COUNT
B / BOOST	HALF*

INTERACTION	
P / PICK	1
D / DROP	1
R / READ	1
A / ACCESS	1

CONTROL	
C / SCAN	2
L / LINK	2
X / RESET	--

** BOOST CYCLE COST ROUNDS UP. ACCESS USES A KNOWN CODE. SFX REMAIN ON WHEN MUSIC IS DISABLED.*
